

Marcus Bowler

Creative Generalist | Animator | Curious Enthusiast

@MarkoBowlo www.markobowlo.co.uk

Summary

I'm a video editor, motion graphic animator, story boarder, sound designer, character animator, illustrator, idea creator and 3D animator who works in various art styles from realistic to stylised for various B2B & B2C clients. I have an appetite for learning new skills and softwares to help solve problems and find new inspirations to further my exploration as an artist.

Work Experience

Senior Creative Generalist
Salamandra Animation Studios
Windsor, England
2016 - Present

I have worked on main stage conferences, content for interactive experiences, animated social media videos, in-store print collateral, explainer videos, educational materials and a few commercial videos for television spots. At Salamandra, I've learned to become a creative generalist by adapting to new challenges, asking the right questions and learning new skills to tackle problems on each project I've worked on. Despite being a small studio we've punched above our weight working on multiple projects at once to achieve tight deadlines.
